EDUCATION

Institut Teknologi Bandung **Jun 2020 – Aug 2024**

- Bachelor of Engineering in **Computer Science** — **GPA: 3.88**
- Activities & Societies: **AI & ML** Teaching Assistant, ShARE Consulting, IISMA'23 Student Exchange, CSLeader (TASLA) Scholars
- **DataCamp Professional Data Scientist** [License] — Issued Aug 2022

University of California, Davis **Aug – Dec 2023**

- Part of **IISMA 2023,** studied 6 multi-discipline courses under UC Global Study Program, **Grade: A — 3.94**
- Notable Courses & Activities: Management IT (Process — Tech), Computational Neuroscience, AI Symposium (Paypal, HP)

WORK EXPERIENCES

Full-Stack Data Scientist at Supertype — (International Data Science Consultancy) **Jan - July 2023**

- Refined legacy topic extraction module by incorporating state-of-the-art methodology using Transformer (Huggingface), PyTorch, and NLP toolkits, leading to 100% increase in efficiency and 30% reduction of topic extraction redundancy.
- Deployed and maintained in-house product (Supertype Summary) prototype into an on-demand service using Django REST Service and Google Cloud Platform with 92% availability rate along with 24/7 monitoring infrastructure.
- Optimized client deliverable approaches through feature engineering and assessment, identifying the presence of irrelevant data points and features, leading to model performance improvement across multiple cases.

Software Engineer in Test Intern at Blibli **Jun – Dec 2022**

- Expanded and debugged multiple modules on 5 out of 12 automation services in the Checkout & Promotion Unit using Java (Spring), Cucumber, and Selenium WebDriver with BDD practice, resulting in a 10% increase in web app test coverage.
- Improved data ingestion pipeline by implementing Kafka wrapper in 3 core backend services, reducing code size by 20% and boosting test run efficiency by 10%.
- Ensured data consistency & completeness across multiple environments, reducing erroneous test rate by average of 35% across all affected services.

Software Engineer Intern at Ruangguru **Jan – April 2022**

- Acquired end-to-end workflow development expertise for backend services using hexagonal architecture through intensive 3-week training in Golang, design patterns, infrastructure, and monitoring, achieving an 85% task completion rate.
- Engineered a coding judge and management software within 3 weeks to monitor over 1000 bootcamp users using Golang and GitHub API, cutting mentor workload by 50% and boosting user task completion rate by 15%.
- Optimized Golang semantics by prototyping benchmark services, slashing code size by 35% and enhancing readability.

Data Scientist Intern at Wilov ID — (Former Female Healthcare Startup) **Jun – Dec 2021**

- Developed and maintained mobile app data dashboard using Looker Studio & Google Analytics 4 across user demography, app performance, churn rate, and business funnel, serving as cross-functional business insights to drive major features revamp decision.
- Enhanced data warehouse efficiency by normalizing data and creating views and aggregations using BigQuery, cutting dashboard reload time by 30% and improving accessibility for the engineering team.

ACHIEVEMENTS & AWARDS

[International]	Indonesian International Student Mobility Awards — UC Davis	**Jul 2023**
[International]	Finalist of Higher Education DOMO Case Competition — DOMO, Utah	**Nov 2023**
[Funded Scholarship]	Technology and Science Leadership Academy — Glints & Monk's Hill Ventures	**Aug 2022**
[National]	Top 10 of Data Mining Team — Gemastik XV, Ministry of Education Indonesia	**Nov 2022**

LEADERSHIP, INCUBATION, & VOLUNTEER EXPERIENCES

Data Analytics Lead at Internnet Indonesia **Dec 2021 – Jul 2024**

- Leading a team of 3 to manage data warehouse and produce mentorship analytical insights, leading to 6 secured partnerships and fundings.
- Orchestrating the development of mentor-mentee matchmaking algorithm deployed using FastAPI & Python Data Analysis libraries, eliminating 95% of manual operational post-filtering process while maintaining mentorship satisfaction rate.

AI Incubation Mentorship by KORIKA — Indonesia's Intelligence Agency (BRIN) **Feb – May 2024**

- Selected among 4 teams out of 140+ for ideation of automatic gaming QA model to increase testing efficiency up to 100%.

Director of Operations at GICC by Institut Teknologi Bandung Campus Cabinet (KM ITB) **Feb – May 2022**

- Coordinated a full-stack development team consisting of 8 engineers, successfully built website using React & Express JS to accommodate 200+ organic participants and attendants with ~5% of downtime errors.

Project Associate – ShARE ITB **Aug 2021 – May 2022**

- Provided KYC service expansion insights to 4+ SEA countries as data analytics champion for Verihubs.
